Backend: Node.js, Express, .NET 9, Python, Prisma, MikroORM, JWT

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Cloud: Docker, Azure DevOps, Azure, Git, GitHub, Terraform, XAMPP

Security & QA: Kali Linux, Nmap, Cortex, Lumu, Sophos, VirtualBox, VMs, Playwright, Active Directory management, MSP, SAP

Languages & Systems: Python, JavaScript, TypeScript, PHP, C, Pascal, Smalltalk, Windows, Linux, Ubuntu, iOS

Office & Modeling: Microsoft 365, Excel, SAP, AutoCAD, Axure, AnyLogic, MD, DER

KEY PROJECTS

Flight Management System

Node.js, Express, MySQL, JWT, PHP, MVC, Bootstrap 5

Academic full stack project for managing flights, reservations, promotions, and operational reports with role-based control. Includes a REST API in Node.js + Express and a PHP MVC version.

AlojARG - Booking Platform

.NET 9, Angular 20, TypeScript, MySQL, JWT, Docker, FluentValidation

Full stack solution for tourism accommodation reservations in Argentina, built with Clean Architecture, RESTful authentication, dynamic filters, favorites, comparison tools, and an administrative dashboard.

BookCode - Book Management & Reviews

React, TypeScript, Node.js, Express, MikroORM, MySQL, JWT, Redis

Full stack web platform to discover, manage, and review books. It includes secure JWT authentication, curated reviews, personalized lists, recommendations, and external integrations for book discovery.

FISICA-MODELO - Interactive simulations

JavaScript, p5.js, HTML5, CSS3, Chart.js, Node.js

Interactive educational simulations built with p5.js to explain Bernoulli's principle and Newton's laws through real-time visualization.
